Auto-Confirming Communities

Overview

By auto-confirming communities, you can skip manual confirmation after being approved by a community. This article will explain how to enable/disable the auto confirmation option.

Auto-Confirm Trusted Communities

How auto confirmation works:

- The community approves you during the application process.
- You automatically confirm the shift.

Cancellation rules and penalties can still apply.

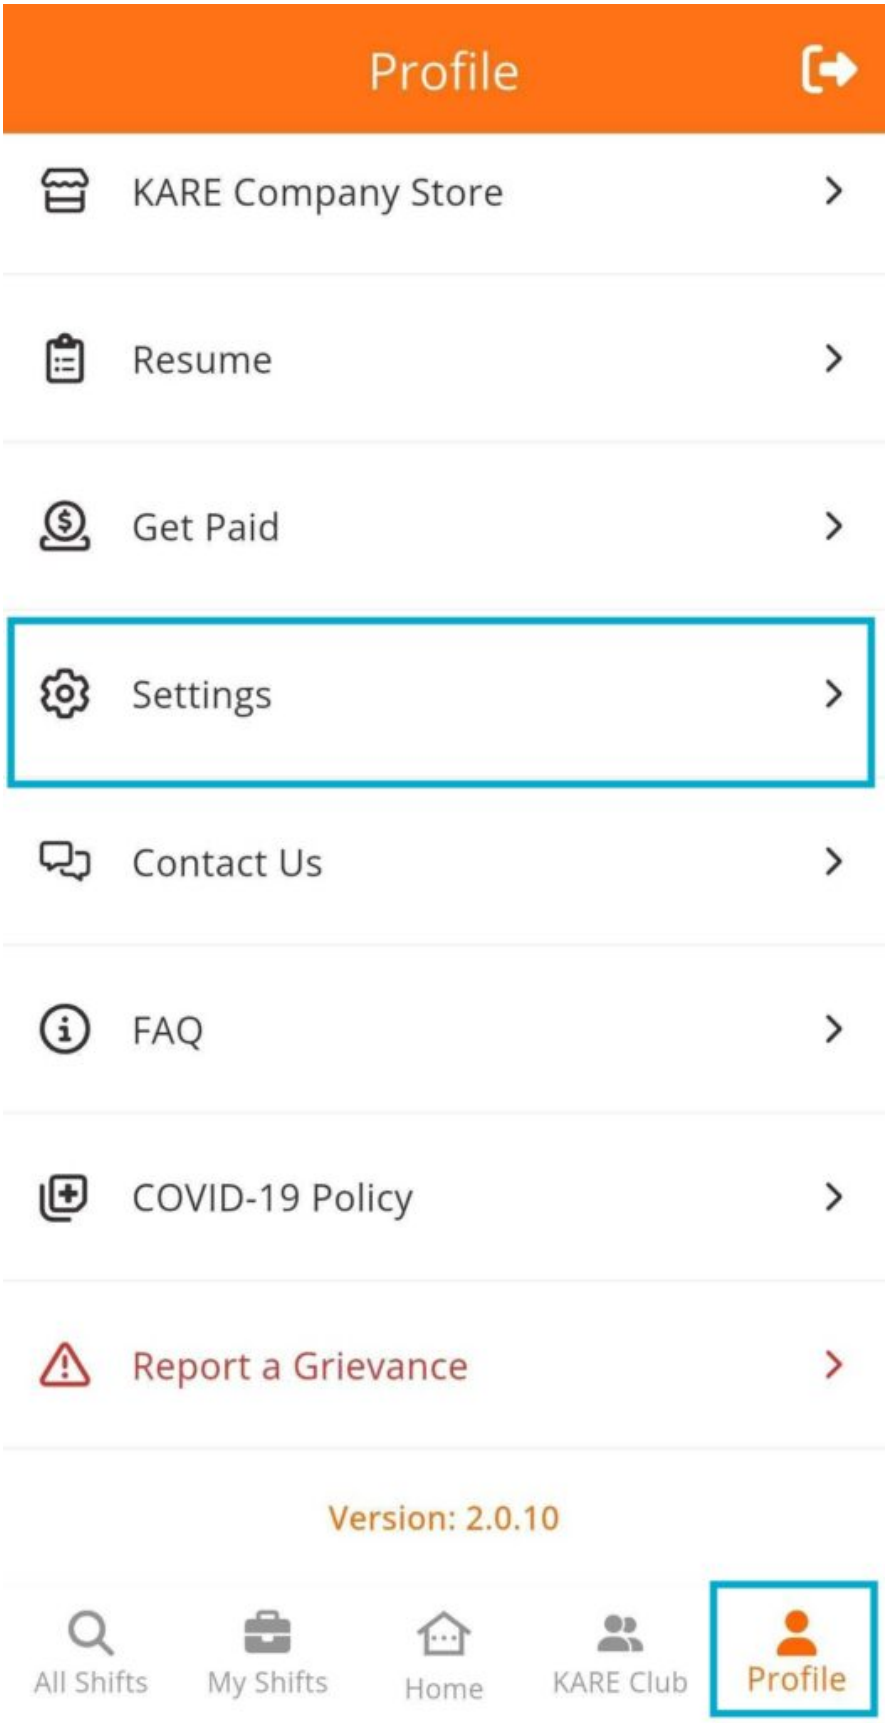

Enable/Disable auto-confirm from a shift:

In addition to being asked if you'd like to auto confirm when confirming a shift, you can also manually enable/disable by doing the following:

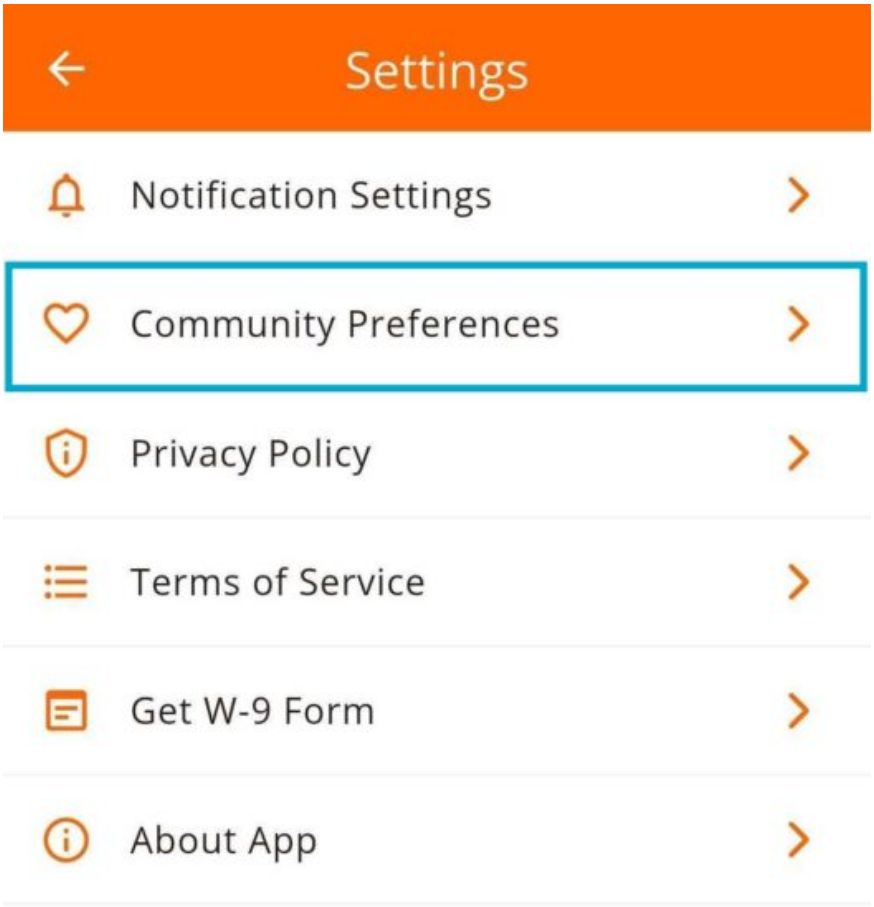

1. Open a shift from a community.
2. Go to "About Community"
3. Tap "Auto Confirm" or "Stop Auto Confirm"

Disable auto-confirm settings from your profile:

1. Go to **Profile**
2. Tap **Settings**

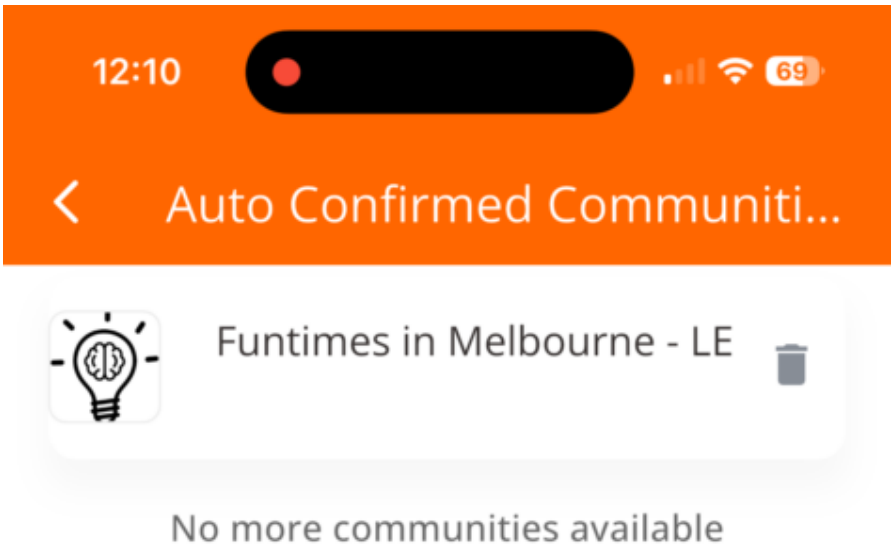

3. Tap **Community Preferences**

4. Tap **Auto Confirmed Communities**

5. Delete a community from auto confirmation by tapping on the **trash can > confirm.**
